(RE-) THINKING THE EU FROM THE SOUTH

The European Union is in one of the most profound crisis in its history. The current political, cultural, social and institutional processes pose a great challenge to Europe.

A radical rethinking of the European idea is urgently necessary, not only from a philosophical and cultural point of view but also with regards to the political and institutional model of the EU. The international network RUB Europadialog is working on these questions since 2015.

Its 4th workshop aims to reflect on civil engagement for the future of the European Union, starting from a Southern perspective and emphasizing interdisciplinary approaches between law and philosophy as well as political and cultural history.

The workshop will address the following main topics: the process of European integration and its future perspectives, social and civil engagement for a better EU, Southern Italy in the history of Europe, European Memory and philosophical idea of Europe and, finally, Albania's relations with the Apulia Region and its prospects of joining the European Union. The workshop will be part of a series with previous events in Oviedo (2015), Athens (2016) and Sarajevo (2016).
