

FOR A COUNTER-CONFERENCE IN BERLIN

Before the COVID19 we had the **deadlock** between 27 governments on the **content** and the **outcome** of the future of Europe. The deadlock is a situation in which an agreement cannot be made and ending a disagreement is impossible because neither side will give up something that it wants.

Inside the Council there is a **Pentagon** with the **Portuguese clinging** to the Lisbon Treaty, the **Austrian claiming** the return of EU competences to the MS, the **Danish** ideologically **hostile** to the Treaty reform, the new French and Italian Alliance quite **open** to break the tabou of the untouchability of the treaties in an innovative sense and the others - starting with the Germans - **crouched** in a swamp.

The only way **to unlock the deadlock** is to forget the **folding CSOs seat** in the future (but still uncertain) Conference and organise a “**counter-conference**” in Berlin during the German Presidency founded on the idea of **a revolutionary path for a popular unrest** with the mandate to write a list of “**cahiers de doléances**” addressed to EP and asking it to assume a **constituant power** on behalf of the EU citizens.
