BLOCKCHAIN & EUROPE'S GOVERNANCE TRANSFORMATION FROM GLOBAL TO LOCAL.

In the framework of the Blockchain for the UN Charter Values and the SDGs Initiative (BC100+)¹

Hybrid Meeting in the framework of the ASviS Festival, May 17th, 2023.

Place of venue Campus EINAUDI

SALA LAUREE BLU

Host : The University of Torino, Turin, Italy.

To register : <https://forms.gle/LoJyBAFTLTcDxnR18>

Working Language: English and Italian with simultaneous translation

Introduction.

We are at a pivotal moment in human history. The way we deploy distributed ledger systems offers the possibility to ensure the well-being of all and a "safe operational space for humanity", a feature that we have failed to accomplish in the past 40 years.

At the same time, Europe is called upon to change profoundly in the age of 21st century totalitarianism and the need to create a new relationship with the citizens of all of Europe as well as with the Global South. Faced with the challenges for our security and our resilience, and the urgent need to accelerate the implementation of the Sustainable Development Goals, it is imperative to "change the rules of the game".

This opportunity arises thanks to "digital decentralized empowerment tool" for fighting corruption, tackling organised crime, restoring confidence, considerably increasing our efficiency, measuring our impact and protect our values, reorienting the management of our economy and finance, a "Game Changer" to " Regenerate the Planet and Regenerate Europe" leading to new development models, an economy of transparency, just transition and values redistribution.

¹ The BC100+ initiative has an advisory *High-Level Group* with the participation i.a. of Mr. Janez Potocnik (International Resource Panel), Ms Nena Dokuzov (Slovenia, member of the European Blockchain Partnership which regroups 29 European Governments and the EU Commission), Ms Mega Roberts, UN Foundation, Mr Simon Zadek (Nature Finance), Mr Adama Mariko (Finance in Common, global platform of Development Banks).

The BC100+ initiative of The-EPE has convened a *Steering Group* bringing together technology, sustainable development and science for global strategic leadership of the use of blockchain applications to achievement of the SDGs.

This international hybrid meeting, in the framework of the ASviS Festival, and with the scientific cooperation of the Associazione Comunicazione Pubblica, will consider the importance to regenerate a society of confidence and trust, able to secure the necessary level of resilience of our territories and risk mitigation in the public interest as well as the importance to increase the level of accountability on the basis of commitments made in relation with the SDGs and UN Charter Values;

Objective

Recommendations on how blockchain can contribute to multi-stakeholders, multi-levels empowerment processes to accelerate the transformation and increase the resilience of Europe (as a European Political Community and the EU), Italy, it's Regions and Cities and empowerment of Local Communities and Citizens.
